We have the largest manufacturing of Jewelry and Silverware west of New
York city, and are prepared to furnish special designs.

DUFFY TO QUIT SOON

Board Will Accept His
Resignation.

SUCCESSOR NO PLUMBER

Probably a Civil Engineer Will Fill
His Job--More Trust
Bills.

Plumbing Inspector Duffy is going to
get right into the puddle with the big
ducks and take contracts openly. He
has written out his resignation, and
at the next meeting of the Board of
Health it will be accepted. If he hadn't
written it acceptance would have come
just the same. Meanwhile, Duffy is
laying pipes for some fat jobs, one of
which is whispered to be the mammoth
Young building, for which the founda-
tions are now being prepared.

Duffy says that once out of office he
will reply to the questions asked him
and prove himself a much-abused man.
It is understood that Duffy will make
an affidavit that he never did anything
wrong.

Duffy's successor as plumbing in-
spector will not be a plumber. That is
settled absolutely. The Board of Health
has had enough of that ilk. The new
inspector will be a civil engineer in all
probability. It will be the aim of the
board to appoint a man who will have
no social or business affiliations with
the plumbing trust or its members. No
one standing in with the able-bodied
wielders of lead pipe is desirable.

At the next meeting of the board
an important discussion of the present
sanitary and plumbing regulations
will also take place with a view to en-
tirely rescinding or radically modify-
ing the present rules. No definite ac-
tion may be taken at the next meet-
ing on this subject, but the matter
will be treated fully in the discussion,
and recommendations made to make
the rules less stringent with the resi-
dents.

United States District Attorney
Baird has, as stated in the Advertiser
Saturday, written to the Department
of Justice at Washington relative to
the prosecution of the trust. Mr. Baird
said Saturday: "The impression pre-
vails in some quarters that in order
to convict people of such combination
it is necessary for the Government to
show that the trade restricted is be-
tween two or more States. This is an
entirely erroneous impression. The
Federal laws can do nothing in a sin-
gle State, and it is only where monop-
oly is extended to the inter-State trade
that the laws become effective. Such
is not the case with a Territory, for
the Federal laws are applicable in a
single Territory, and it makes no dif-
ference whether the illegal combina-
tions operate in a single Territory or
with other States, the offenders can be
held accountable to the laws."

Isaac Noar, whose well-founded com-
plaint against the extortion of a cer-
tain plumbing concern was presented
in Saturday's Advertiser, brings now
even stronger evidence of the startling
prices charged by plumbers. Noar
bought a part interest in the Star
building on Fort street near the Or-
pheum some months ago. The build-
ing is comparatively new, and cost to
erect and fit much more than it should
have. Noar says the reason mainly
was the excessive plumbing bill
brought in by Gehring & Butzke. It
seems that a Chinese firm had been
engaged at first to do the plumbing,
but later the work they had done had
been ordered to be done by the in-
spector, and Gehring and Butzke had come in
to take the contract. The bill of this
firm is presented as a model of the
ability of the members of the trust to
make "all that the traffic will bear."

CHINA'S CRUEL FASHION.

Supposed Origin of Binding the Feet
of Children.

All who have the slightest knowledge
of China have heard of the custom of
binding the feet of Chinese girls, but
few are acquainted with the painful
process adopted to secure the diminutive
feet which the Chinese prize so
highly. It is not known how this cruel
custom originated, and the Chinese
themselves seem to be uncertain as to
when it was adopted, but tradition re-
lates that a certain Empress of China,
somewhere back in the twilight of Chi-
nese history, was afflicted with club
feet, and compelled all the ladies of the
court to bind their feet, in the attempt
to secure artificially the same deformity
which nature had inflicted upon her.

There are two distinct styles of bind-
ing the feet in vogue among the Chi-
nese, but the process is the same in
both cases, the different results being
secured by the way in which the bind-
ing is done. The instrument used is a
small roll of firm cotton webbing about
two and one-half inches wide. This
webbing must have no stretch or give
to it, and is woven especially for such
use. The process is usually begun
when the girls have reached the age
of six or seven years, though in some
cases where a particularly dainty pair
of "golden lilies," as the Chinese call
these poor deformities, is desired, the
binding is begun as early as the third
or fourth year.

The foot is taken and all the toes ex-
cept the great toe bent under the in-
step, which is thus forced up. When
this has continued for some time and
the foot has become quite pointed in
shape and the instep considerably
arched, the binding is extended and the
heel and toes drawn together, thus pre-
venting the growth of the foot in
length. In the style of binding in north
China greater pains are taken to pre-
serve the pointed effect, while in south-
ern China the shortness of the foot is
so much desired that the pointed effect
is almost lost and the feet become mere
stumps.

The torture is drawn out through a life-
time, for the binding can never cease.
The seams and fissures caused in the
feet by their distortion become sore and
often gangrene sets in and carries off
the sufferer. In order to prevent this
it is customary to powder the feet with
saltpeter while binding them, thus lit-
erally putting them in pickle to pre-
serve them. The result of this binding
is that all the weight of the body in
standing is thrown on the heel and the
foot loses the power to balance the
body. A small-footed woman cannot
stand still, but, like one on stilts, she
must constantly be stepping backward
or forward to keep her balance.

It is strange how this cruel fashion
freak has fastened itself on the Chinese
women, to whom it has become the
badge of respectability, and whose ele-
gance and distinction are measured by
the greatness of their deformity. The
most advantageous marriages are made
by those whose "golden lilies" are the
most petite, and those otherwise unde-

sirable become prizes if possessed
tiny feet.
The custom is peculiar to the Chi-
nese for the Mongols and Manchus
never adopted it; but so dear is it to
the Chinese that the greatest emper-
or of the present dynasty, who suc-
cessfully imposed upon the Chinese the
ling of the queue as a badge of su-
periority, did not dare to risk his au-
thority in an attempt to stamp out the
practice within the limits of his
capital at Peking. The work of
missionaries is, however, beginning
to make itself felt, and native
are at least pressing to abolish
cruel and ancient custom—
